A SHORTENED STATUTORY PERIOD FOR REPLY WHICHEVER IS LONGER, FROM THE MAILING DA - Extensions of time may be available under the provisions of 37 CFR 1.13 after SIX (6) MONTHS from the mailing date of this communication. - If NO period for reply is specified above, the maximum statutory period w - Failure to reply within the set or extended period for reply will, by statute, Any reply received by the Office later than three months after the mailing earned patent term adjustment. See 37 CFR 1.704(b).	ATE OF THIS COMMUNICATION 36(a). In no event, however, may a reply be tim rill apply and will expire SIX (6) MONTHS from cause the application to become ABANDONEI	I. ely filed the mailing date of this communication. O (35 U.S.C. § 133).				
Status						
1) Responsive to communication(s) filed on 04 Ja	nuary 2005.					
	Since this application is in condition for allowance except for formal matters, prosecution as to the merits is					
closed in accordance with the practice under Ex parte Quayle, 1935 C.D. 11, 453 O.G. 213.						
Disposition of Claims						
4)⊠ Claim(s) <u>1-10</u> is/are pending in the application.						
4a) Of the above claim(s) is/are withdrawn from consideration.						
5) Claim(s) is/are allowed.						
6)⊠ Claim(s) <u>1-10</u> is/are rejected.						
7) Claim(s) is/are objected to.						
8) Claim(s) are subject to restriction and/or election requirement.						
Application Papers						
9) The specification is objected to by the Examiner.						
10)⊠ The drawing(s) filed on <u>04 January 2005</u> is/are: a)⊠ accepted or b)□ objected to by the Examiner.						
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).						
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).						
11) The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.						
Priority under 35 U.S.C. § 119						
 12) Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f). a) All b) Some * c) None of: 1. Certified copies of the priority documents have been received. 2. Certified copies of the priority documents have been received in Application No 3. Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)). * See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

This action is in response to Preliminary Amendment filed January 4, 2005. Claims 4, 6, 8 and 10 have been amended as requested by the applicant.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-7 and 10 are rejected under 35 U.S.C. 102(b) as being anticipated by Tanaka (US 5,550,657).

Regarding claim 1, Tanaka discloses an optical lens component comprising a central lens element (23) having an optical axis and located centrally of a circumjacent mounting portion (Fig. 3) having spaced parallel surfaces that extend perpendicularly to the optical axis (interfaces between 23 and 27 and 23 and 26), at least one of the spaced parallel surfaces being provided with a non-random light-scattering structure (26) for coupling out light entering the mounting portion (Fig. 3).

Application/Control Number: 10/520,191

Art Unit: 2872

Regarding claim 2, Tanaka discloses the non-random light-scattering structure comprises indentations having parallel light-scattering surfaces with predetermined inclinations relative to the spaced parallel surfaces (Fig. 3).

Regarding claim 3, Tanaka discloses the indentations comprise at least one array of concentric circular indentations centered on the optical axis of the lens element (Fig. 25).

Examiner interprets "concentric circular indentations" to be similar to those shown in Figs. 3-4 of the current application, since these are the only drawings that show views of the indentations. The indentations of Fig. 25 in Tanaka resemble the indentations shown in Figs. 3-4 of current application.

Regarding claim 4, Tanaka discloses the indentations in at lest one array have triangularly shaped cross sections in a plane in which the optical axis of the lens is located (Fig. 3).

Regarding claim 5, Tanaka discloses all indentations have identically shaped cross sections in at least one array (Fig. 3).

Regarding claim 6, Tanaka discloses the triangular shape is asymmetrical relative to a local perpendicular (Fig. 25).

Regarding claim 7, Tanaka discloses the triangular shape comprises a right angled triangle having one leg lying in the plane of the respective spaces parallel surface of the mounting portion, the second leg being disposed on the side of the triangle facing the central axis (Fig. 25).

Regarding claim 10, Tanaka discloses the light absorbing means (22a) are provided adjacent at least one non-random light-scattering structure (Fig. 3; col. 7 lines 66-67).

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all

obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the

manner in which the invention was made.

Claims 8 and 9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Tanaka

(US 5,550,657) in view of Ohkawa (US 6,568,820).

Tanaka teaches the invention as claimed but lacks reference to molding. Ohkawa teaches

the use of molding to create the an optical lens element (col. 6 lines 11-24). It would have been

obvious to one of ordinary skill in the art at the time the invention was made to have the Tanaka

reference crated by molding as taught by Ohkawa for the purpose of precise and efficient

reproduction of the light-scattering structure.

Conclusion

Any inquiry concerning this communication or earlier communications from the

examiner should be directed to Joshua L. Pritchett whose telephone number is 571-272-2318.

The examiner can normally be reached on Monday - Friday 7:00 - 3:30.

Application/Control Number: 10/520,191 Page 5

Art Unit: 2872

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Drew A. Dunn can be reached on 571-272-2312. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
